This course prepares students for certification. The exam is designed to certify the competency of entry level PC computer service professionals in installing, maintaining, customizing, and operating personal computers training. Our curriculum is designed to prepare students as tech support specialists. Instruction includes computer repair, introduction to basic computer theory, hardware components of a computer system, motherboards, microprocessors, memory, hard drives, sound, video, and wireless adapters. Maintenance of operating systems such as Windows 7 and above, cloning and data recovery, antivirus, and spyware will also be covered, as well as network basics, network equipment, wireless, servers, and sharing resources as well. This is an excellent beginning course for students wanting to become certified, enter the IT field, and/or the networking classes.
